Mission

The University of Tokyo aims to be a world-class platform for research and education, contributing to human knowledge in partnership with other leading global universities.

The University of Tokyo aims to nurture global leaders with a strong sense of public responsibility and a pioneering spirit, possessing both deep specialism and broad knowledge.

The University of Tokyo aims to expand the boundaries of human knowledge in partnership with society.

The University of Tokyo and Todai

In English we are known as the University of Tokyo and in Japanese as Tokyo Daigaku (東京大学), which literally translated is "Tokyo University." In Japanese, however, compound words are often abbreviated to just the first character of each component. Abbreviating Tokyo Daigaku leaves Todai (東大), which is how most people refer to us in Japan. In 2013, the University of Tokyo announced that the abbreviated English name of the University would be UTokyo.

About the University

The University of Tokyo is Japan's top university, a world-class center for research, and a vibrant academic community.

World-class research

The University of Tokyo's researchers have been at the forefront of their fields since our foundation in 1877. Today, their cutting-edge research regularly appears in top international journals and has earned multiple Nobel prizes. Research at the University of Tokyo across the arts and sciences is both broad and deep, as specialist knowledge is shared across traditional boundaries to further human understanding.

A robust education

The University of Tokyo's undergraduate education emphasizes the liberal arts for the acquisition of strong communication skills, a sound ethical framework, and interdisciplinary awareness, together creating a solid

foundation for specialized knowledge. Volunteer activities, internships and other off-campus experiences are an increasingly important part of a University of Tokyo education.

A vibrant community

The University of Tokyo is a vibrant community in which world-class researchers work together with excellent students from Japan and more than 100 other countries. Alumni fill leading positions throughout Japan, Asia, and increasingly around the world.

Academic and administrative staff

The University of Tokyo is a major employer with 10,227 staff members. Our academic staff numbers 5,807. The University lists positions as permanent or fixed-term,

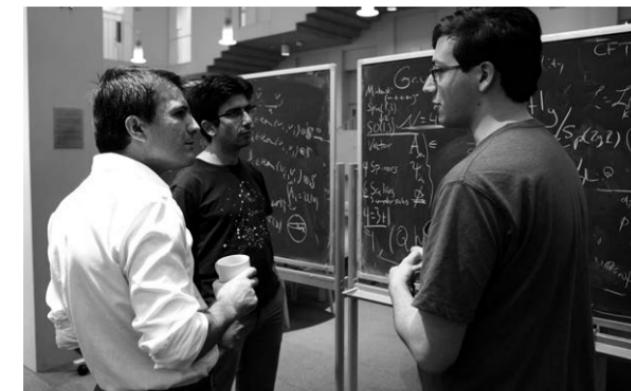

which applies to the post, not the person. About two-thirds of academic staff members in permanent posts (from research assistant to professor in the table) have tenure; the remainder are on fixed-term contracts. Most other staff members in permanent posts are on permanent contracts.

Academic and administrative staff	Permanent posts			Fixed-term posts			Total
	Male	Female	Subtotal	Male	Female	Subtotal

<i>Total</i>	34	74	34	74	273	26	515

Foreign academic and administrative staff

An increasing number of our staff members come from overseas. Currently, nearly 9% of our faculty are foreign. In addition, many researchers visit us for short periods, creating an international environment in which our international staff can feel at home. The figures above include staff members in both permanent and fixed-term positions. The University is also exploring the joint appointment of faculty with overseas institutions in order to increase the number of foreign faculty members.

Education

Highly competitive admissions, extensive international partnerships, and a tradition of liberal arts education ensure that the University of Tokyo provides a diverse and highly stimulating intellectual environment.

A competitive environment

Domestic students applying to the University of Tokyo take the common national university entrance examination, following which exceptional candidates can choose to sit the University's demanding entrance examination. The number permitted to sit this exam is limited so there can never be more than between 2.5 and five applicants for each position. The dates for graduate admissions vary widely. Please check the website of each faculty or graduate school for further information (page 28).

On average, about one in four applicants to undergraduate programs is successful, and 43% to MA programs. Three-quarters of applicants to PhD programs are successful, but this includes many students who enroll in combined MA/PhD programs. Roughly one in two external applicants to PhD programs is successful.

Language

It is often possible to study in English or in Japanese at the graduate level. Students can enroll in PEAK (Programs in English at Komaba) at the University of Tokyo's Komaba campus and study entirely in English for their undergraduate degree as well.

Undergraduate education

Undergraduate education at the University of Tokyo is divided into junior and senior divisions, each of two years. In the former, students study a liberal arts-based curriculum on one of three humanities, three sciences, or one general program. In the latter, students go on to specialized study in their chosen faculty.

Level	Applicants	Successful applicants	Percentage
Undergraduate	12,237	3,154	25.8
MA/Professional	7,399	3,178	43.0
PhD	1,778	1,294	72.8

Enrollment

The University of Tokyo has 27,543 regular students, roughly evenly divided between undergraduate and graduate students. Graduate students themselves are roughly evenly divided between MA and PhD programs. International students number 2,491 or 9% of the total, most enrolled in graduate programs. Male students outnumber female students four to one among domestic students. Of international students, 58% are male and 42% are female.

Group		Undergraduate	MA	Professional	PhD	Total
Domestic students	Male	11,301	4,544	560	3,350	19,755

International exchange

Study abroad

University of Tokyo students benefit from a wide range of academic exchange agreements with other universities. In 2012, 429 students visited our partner universities. Most of these were graduate students (79%). The University hopes to increase the number of undergraduates that make use of exchange opportunities.

International students

In May 2013, 2,912 international students enrolled in programs at the University of Tokyo, 426 (15%) as research students and 2,486 (85%) as full-time students. Less than 10% of international students studied at the undergraduate level, while over 90% studied at the graduate level. The University is increasing the number of programs available in English at both the undergraduate and graduate levels, so we expect to see an increase in the number of undergraduate international students in coming years. Additionally, many students join us for short periods during their studies at their home universities.

Admissions

Students can study at the University of Tokyo as either regular students (degree candidates) or research students. Admission is in April and October. To be eligible for admission to an undergraduate program, students should have completed twelve years of formal education equivalent to that in Japan, or have been awarded an International Baccalaureate by the International Bureau of Baccalaureates. (See the PEAK website for entrance requirements for that program.) To be eligible for an MA or PhD program, students should have at the time of admission a bachelor's or master's degree or a level of education equivalent to that of a Japanese university. Eligibility for admission to a combined MA and PhD program is the same as that for an MA program. Students may also be admitted if the University recognizes that they have suitable academic background and experience to undertake their studies. Admission is granted to most programs after a written examination, but there are a few graduate programs that accept students on the basis of past academic attainments, letters of reference and essays. Please contact the relevant faculty or graduate school for more details (see page 28).

Campus life

The university environment lets you focus on your research and studies so that you can perform at your best, but you are also a member of a community that provides effective support when the occasion demands.

Support for students and researchers

As the preeminent academic institution in Japan, the University of Tokyo has a long history of nurturing and promoting academic excellence. The International Center has offices on each of our main campuses and provides support for international students and researchers coming to study at the University and for our students studying at our partner institutions around the world. The International Center also provides advice on academic and personal matters, as well as mental health counseling for individual and family problems. The Center for Japanese Language Education provides Japanese language education for international students and researchers. The University Career Center arranges job fairs and provides information for students nearing the end of their studies.
www.u-tokyo.ac.jp/url/aac

Scholarships

Our domestic and international students are supported through the University's own scholarships and tuition fee waivers, and through scholarships from the Japanese government, companies and foundations. A large proportion of our international students are funded through such programs. One of the best places to start looking for information about scholarships is on our website. The Japan Student Services Organization (JASSO) website also provides details about scholarships and studying in Japan. Applicants are encouraged to apply for the Japanese Government (MEXT) scholarships, more information about which can be obtained from the Japanese consulate in your home country.
www.u-tokyo.ac.jp/url/aad, www.jasso.go.jp/index_e.html

Accommodations

Accommodations for students and researchers at the University of Tokyo are managed by the Housing Office. While University accommodation reserved for international students can only house a small portion of those who join us each year, the accommodations available are increasing and students also have access to student accommodation managed by other organizations, rooms in company dormitories and private accommodation. Further information is available on the University website.

S = accommodation reserved for students, R = reserved for researchers. Data correct as of April 2013.

Student life

At the University of Tokyo we value our links with society, and students organize two public festivals that provide visitors with a glimpse of university life. In addition, the University holds an annual open campus event which introduces university life to several thousand high school students from all over Japan each year. Increasingly, prospective international students also attend this event. Students also engage in a variety of sports and cultural activities through student clubs.

Research

Standing on the strong foundations built up by their predecessors, our researchers are consistently at the cutting edge across the full spectrum of academic endeavor.

Research facilities

Excellent facilities support research and education at the University of Tokyo, including a superb library system, the University Museum and two major hospitals, which are also open to the public and are a point of contact with the local community. Cutting-edge facilities including supercomputing resources support University members' research.

University Library System

While the General Library on the Hongo campus contains a large collection of books, journals and other materials in Japanese, English and other languages, the majority of specialized materials are held in the 32 departmental libraries that comprise the University Library System. The

system holds over 9 million books, nearly half of which are foreign. The largest portion of foreign books are in English, but there are also significant collections in other major languages. There are also over 160,000 journals, nearly half of which are in foreign languages. The library actively purchases materials as required for research and education. An increasing quantity of material is digitized in the University Repository.

University Museum

The University Museum is the largest of its kind in Japan, with a collection of over three million items. The museum holds materials to support research and education at the University of Tokyo gathered since the University's foundation in 1877, and fixed and mobile exhibits are often open to the public.

	Total books		Total journals	
	Total	Foreign	Total	Foreign
Faculties and institutes	7,658,923	3,678,291	119,364	51,925

Kashiwa Library	380,304	281,092	21,561	15,379
<i>Total</i>	9,266,963	4,385,263	160,184	75,841

Data correct as of March 2013.

University Hospitals

The University of Tokyo has two major hospitals, both of which were instrumental in the introduction of western medicine into Japan. The Faculty of Medicine University Hospital grew out of the Kanda Otamagaiké Vaccination Center founded in 1858, and aims to provide the best possible individual care. The smaller Institute of Medical Science Research Hospital was established in 1894 and specializes in translational research, aiming to bridge the gap between basic research and the bedside.

Industry and government cooperation and outreach

The University of Tokyo is committed to ensuring the

transfer of our research outcomes to society, and industry cooperation is one of the most effective means of achieving this. Over 200 Japanese and foreign companies partner with us and fund over 100 collaborative research projects, a mainstay of our research and one that provides a significant portion of research income. To ensure effective research and positive outcomes, collaborative research is first evaluated through the Proprius21 process, ensuring common understanding of research goals, establishing metrics and milestones for measuring progress, and determining ownership of results and intellectual property. In addition, the best of the University's research is promoted on the Todai Research website.

www.u-tokyo.ac.jp/url/aae

Interdisciplinary research

The University of Tokyo promotes both inter- and intra-university interdisciplinary research, through the establishment of interdisciplinary institutes such as the Kavli Institute for the Physics and Mathematics of the Universe (Kavli IPMU), and networks of researchers from multiple disciplines across multiple universities, such as the Network for Education and Research on Asia and the Institute of Gerontology.

International research

The University of Tokyo aims to create a campus that is a premier platform for education and research and celebrates the world's diverse cultures, values, and languages. Consequently, the University of Tokyo is an important part of several regional and global university networks to promote collaboration in research and exchange of researchers, including the International Alliance of Research Universities (IARU), the Association of East Asian Research Universities (AEARU), and the Association of Pacific Rim Universities (APRU). Some of our world-leading institutes are created as centers of international cooperation, such as the Kavli IPMU.

Exchange of researchers

Of the University of Tokyo's 384 academic exchange agreements, 353 include a research element and our researchers make active use of these agreements to engage in research throughout the world. In 2012, researchers from the University of Tokyo registered 10,435 overseas research visits, and researchers from other institutions registered 3,524 visits to our campus.

<i>Total</i>	10,435	3,524

Finances

As a national university corporation partly supported by the Japanese public, the University of Tokyo has a responsibility to ensure the efficient use of funding, and implements effective auditing and transparent accounting practices.

2013-2014 Budgeted revenue

Over one-third of University income comes from government subsidies. Research grants and collaborative research with industry and government provide another one-third. The University Hospital is another major source of revenue, accounting for more than one-sixth of the total. Tuition fees account for approximately 8%.

2013-2014 Budgeted expenditure

Over one-third of total expenditure is spent on research and research grants. Nearly another third goes on personnel costs. The remaining major expense is purchasing material items, which includes all research materials.

Budgeted revenue	Amount (million yen)	%
Government subsidies for management expenses	78,324	34.4
Collaborative research and endowment projects	56,227	24.7
University hospitals	42,284	18.5
Research grants	28,068	12.3

Subsidies for facilities construction/maintenance	4,473	2.0
<i>Total</i>	227,772	100.0

<i>Budgeted expenditure</i>	<i>Amount (million yen)</i>	<i>%</i>
Personnel	74,593	32.7
Collaborative research and endowment projects	56,227	24.7
Materials expenses	54,654	24.0
Research grants	28,068	12.3
Facilities construction and maintenance	4,473	2.0
Repayment of long-term debt	5,465	2.4
Retirement stipends	4,292	1.9
<i>Total</i>	<i>227,772</i>	<i>100.0</i>

Research income

Research income to the University comes from both the public and private sectors. Of Scientific Research Grants from the government, half is used to support fundamental research, and over 10% goes to support young researchers. Nearly 1% of the total is from programs supporting new researchers and for women researchers returning to work after maternity leave.

Intellectual property

Since university incorporation in 2004, the University of

<i>Research income</i>	<i>Number</i>	<i>Amount (million yen)</i>	
Private sector research collaboration	1,412	5,067	
Scientific research grants	4,971	23,319

Faculty	727	172	553	197	373	240	3,047,964
<i>Total</i>	<i>4,581</i>	<i>877</i>	<i>3,876</i>	<i>741</i>	<i>2,408</i>	<i>1,021</i>	<i>4,117,963</i>

Tokyo has increased the number of patents held by the University and by faculty members. Specialized licensing organizations (Todai TLO, CASTI) have been established to manage and monetize these patents. Other intellectual property including trademarks, software copyrights and other intangible assets provide income to the University.

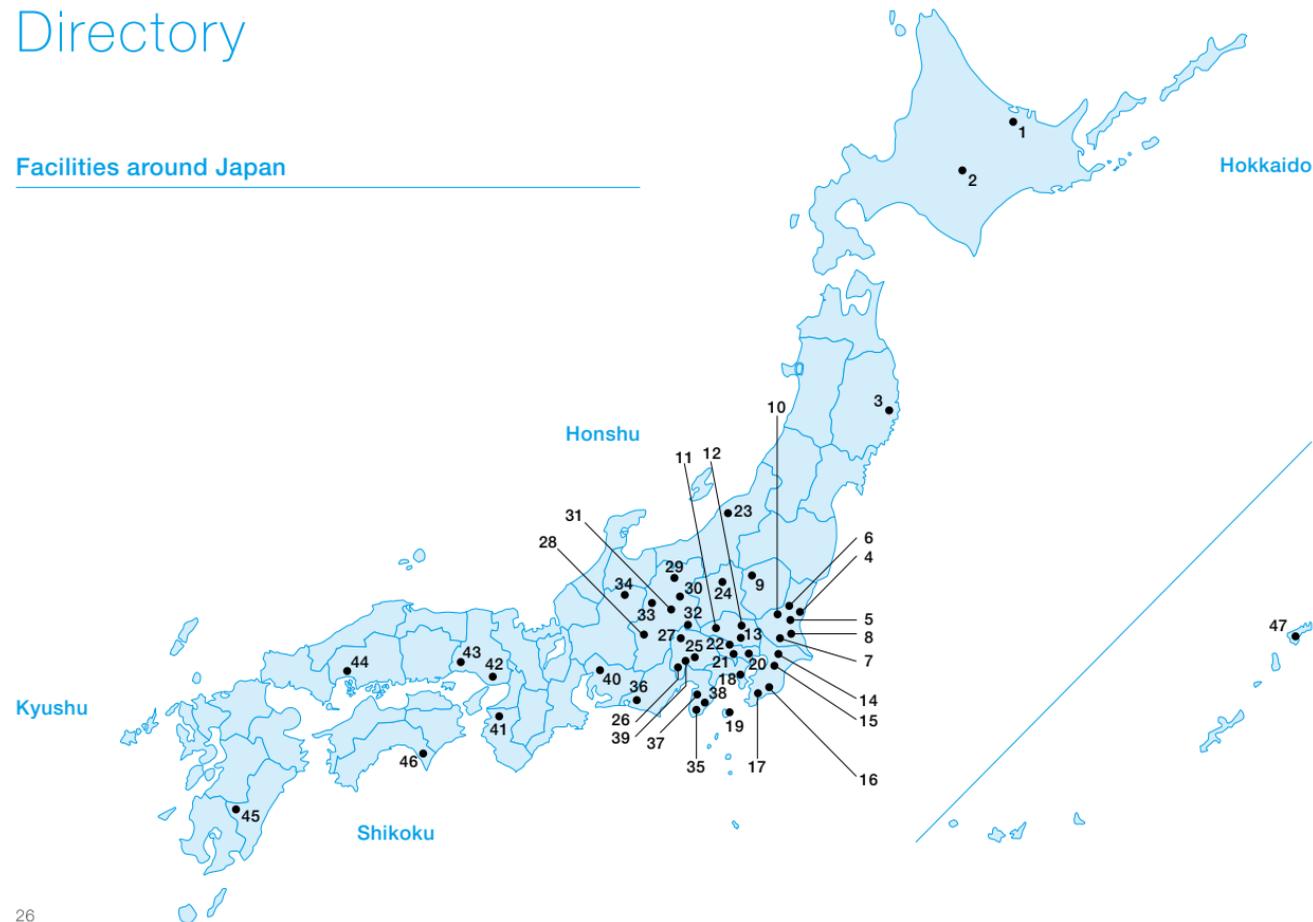

The University of Tokyo Foundation

The University of Tokyo is supported in part by a range of gifts and donations from individuals and organizations, a large proportion of which are intended for specific purposes. Donations totaling 8.6 billion yen were received in financial 2012 by the University as a whole. After incorporation in 2004 the national universities established foundations, at which time the University of Tokyo Foundation was established to support the University's activities by strengthening its financial base. The Foundation's current balance is 9.3 billion yen. In financial 2012, 11,142 donations totaling 1.3 billion yen were received, 47% by value and 99% by number from individuals. The University is extremely grateful for this strong public support.

Directory

Facilities around Japan

Seismology and volcanology

7. Tsukuba Seismological Observatory
12. Dodaira Seismological Observatory
17. Nokogiriyama Geophysical Observatory
18. Aburatsubo Geophysical Observatory
19. Izu-Oshima Volcano Observatory
23. Yahiko Geophysical Observatory
26. Fujigawa Geophysical Observatory
29. Shin-etsu Seismological Observatory
30. Asama Volcano Observatory
31. Komoro Observatory of Seismology and Volcanology (KOSV)
41. Wakayama Seismological Observatory
44. Hiroshima Seismological Observatory
45. Kirishima Volcano Observatory
46. Muroto Geophysical Observatory

Life sciences

2. The University of Tokyo Hokkaido Forest
3. International Coastal Research Center
5. Animal Resource Science Center
9. Nikko Botanical Garden
11. The University of Tokyo Chichibu Forest
14. Experimental Station for Medicinal Plant Studies

16. The University of Tokyo Chiba Forest
18. Misaki Marine Biological Station
20. Koishikawa Botanical Garden
22. The University of Tokyo Tanashi Forest
22. Institute for Sustainable Agro-ecosystem Services
25. Forest Therapy Research Institute
35. Arbicultural Research Institute
36. Fisheries Laboratory
40. Ecohydrology Research Institute
47. Amami Laboratory of Injurious Animals

Observatories

21. Institute of Astronomy
27. Akeno Observatory
28. Kiso Observatory
32. Yatsugatake Geo-electromagnetic Observatory
33. Norikura Observatory
34. Kamioka Observatory

Physics and engineering

4. Nuclear Professional School
4. Neutron Science Laboratory
6. Research Facility for Radiation Breeding

8. Synchrotron Radiation Laboratory (Tsukuba Branch)
10. Kakioka Research Center
13. Center for Nuclear Study (Wako Branch at RIKEN)
15. Chiba Experiment Station
33. Suzuran Branch Office
34. Kamioka Satellite
42. Center of Computational Materials Science (Kobe Branch)
43. Synchrotron Radiation Laboratory (Harima Branch)

Student houses

14. Kemigawa Athletic Ground, Seminar House
37. Student Hostel, Heda
38. Student Hostel, Shimokamo
39. Student Hostel, Yamanaka Naito Seminar House

Other

1. Tokoro Research Laboratory
24. Tambara Institute of Mathematical Sciences
